Dear Health Care Partner,

We are excited to share with you a unique concept in pharmacy services. Our goal is to create affordable solutions for specific conditions which are fully legal and DO NOT require any prior authorizations from insurance companies.

As a compound pharmacy who has seen “the worst” of our industry, we vow to establish compound pharmacies as a trusted and valued resource in today’s health care market. No longer will we tolerate exploitation of pocketbooks and the creation of questionable business practices.

Our target goal of opening is September 5th. We guarantee you have never seen a pharmacy like ours. By all means we would love you to come by and see our location. At a minimum check out our web-page (About-Pharmacy) to get the full idea of our mission and intent. We are also happy to come back to your location for further discussion in the future as time permits.

We are focusing on *opiate addiction, alcohol addiction, pain management with alternatives to Schedule II opiates, and low-cost erectile dysfunction* drugs. Please contact us (e-mail at Thrivepharmacy1@gmail.com) and we will send a product sheet and price list. Furthermore, we will add you to our “provider page” so that new patients may also find your practice. Feel free to share your own “wish list” and we will come up with a solution together. Ultimately, this is about patient compliance, safety, and affordability. We look forward to taking care of your patients with dignity, compassion, and respect.

Sincerely,

The Staff of Thrive Pharmacy
